

The Pink Reverse-T Kit™

Reverse Trendelenburg Positioning System

Optional One-Step Arm Protectors Available (#40433)

Multiple Pink Pad Configurations Available

- **Safely Prevent Sliding**

An innovative seat contour made of high-density, supportive material ensures anatomically correct positioning, while skin-friendly PinkProtect™ safely prevents unwanted movement in reverse Trendelenburg.

- **Reduce Risk of HAPIs**

Beyond preventing unwanted movement in reverse Trendelenburg, the Pink Reverse-T Kit features a unique material that offers patients unparalleled skin protection.

Unique softness, breathability, immersion, and envelopment characteristics protect against HAPIs (Hospital-Acquired Pressure Injuries).

- **Complete Coverage for Every Patient**

The Pink Reverse-T Kit™ requires less than one minute to set up. A single-use design minimizes cross-contamination risk and improves OR turnover times.

Also Available Separately: Reverse-T Footboard Pad 20"x12"x2" (#40548)

Canada Patents: 2,859,398
Additional Patents Pending

With patients weighing 450lbs or more, and BMIs in excess of 65, safe positioning can be a real challenge. Xodus Medical's Pink Reverse-T Kit not only prevented our patients from sliding, but did so safely.

— Alicia C, RN, BSN, Surgical Services Manager, Hartford, KY
