

Part of the Camel™ Line of Fluid Waste Management / Floor Safety Products

Fluid waste removal and anti-fatigue properties in a single solution, offering maximum protection to the OR staff and patient.

Fluid build-up in the OR can lead to slips, falls and contaminant exposure. The Mirage™ helps to keep the OR clean, dry and safe. This essential component of an effective Exposure Control Plan aids you in meeting OSHA standards for containment and handling of bloodborne pathogens. Ideal for fluid-heavy procedures, the Mirage integrates into direct-to-drain and OR suction systems, minimizing exposure to potentially infectious fluid waste.

The closed-cell material of the Mirage also deters the onset of muscle fatigue, which can lead to diminished surgical performance, endangering staff and patient.

The Mirage maximizes patient and staff safety and minimizes risk and overhead, saving time and money.

Product # 80541

- Waste fluid management – lessen volume of surgical fluid spread throughout the OR
- Infection control – reduce exposure to contaminants
- Increase safety – minimize possibility of injury from slips and falls
- Saves money – reduce OR turnover time
- Minimize the effects of muscle fatigue to OR staff
- Maximize performance – Muscle fatigue adversely impacts surgical performance
