## **Xodus Medical Unveils Mock Operating Room to Promote Ongoing Education for Medical Professionals**

Pittsburgh, PA, September 13, 2023 – Xodus Medical, a medical device manufacturer focused on making surgery safer, has unveiled a new state-of-the-art training center with a mock operating room (OR) at its headquarters near Pittsburgh, PA.

Renovations on the training center and mock OR were completed mid-2023 and are part of a larger company expansion. A mock OR is a non-clinical replica of a real operating room and contains necessary equipment that a medical professional might need to treat a real patient.

“The purpose of our mock OR is twofold: internally, we’re able to provide clinically oriented hands-on training for our sales representatives so they provide up-to-date knowledge to customers. Externally, we’re able to produce high-quality, educational content that will benefit clinical customers,” said Bob Johnson, Vice President of Global Marketing and Product Development at Xodus Medical.

“Medical professionals and Xodus team members alike will be able to experience new technologies in various realistic clinical scenarios,” said Johnson.

Adjacent to the mock OR is a training classroom where staff will be educated and trained on proper use of Xodus Medical patient safety solutions. This robust educational environment allows for training surrounding several of Xodus’ revolutionary products.

Craig Kaforey, CEO of Xodus Medical, said, “We’ve invested into professional training and development for our team and we’re proud to unveil our newest resource for them. This will be a huge asset as we continue to promote ongoing education for clinical professionals.”

More than 310 million surgeries are performed worldwide each year, and it is estimated that an increasing number of surgeries end adversely<sup>1</sup>. Significant steps have been taken in recent years, with Xodus Medical's new training center being part of a larger industry-wide effort to improve surgical outcomes.

## About Xodus Medical

Headquartered near Pittsburgh, PA, Xodus Medical is a medical device manufacturer focused on increasing patient and healthcare worker safety. Providing solutions that meet the recommendations and requirements of WHO, CMS, AORN, TJC and OSHA, we are dedicated to continuously developing products of exceptional quality that make surgery safer and create customer value and satisfaction. Our unwavering commitment to provide medical professionals with high quality products ensures a safer environment for patients, resulting in improved surgical outcomes.
