Additional Patents Pending

Maximize Safety in Trendelenburg

The Pink Pad is an innovative, patented, clinically-preferred solution for increasing patient safety in Trendelenburg. It protects patients against unwanted movement throughout surgical procedures, as well as nerve-injury and Hospital-Acquired Pressure Injury (HAPI) risks.

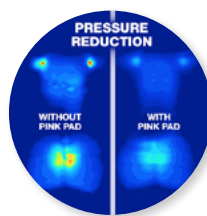

Safely Prevents Patient Sliding

Overcome the positioning challenges of steep Trendelenburg; even with heavy, high-BMI patients

Utmost Protection Against HAPIs

Unique, immersive, enveloping materials are breathable, soft, moisture-wicking, and insulative

Proven Pressure Reduction

In a study of 15 subjects (BMI range: 16–54; mean BMI: 35.5), the Pink Pad achieved an average peak pressure reduction of 43%

Significant Time Savings

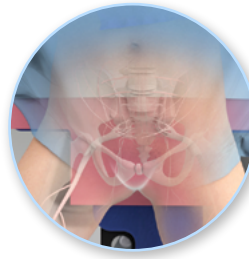

Setup time under one minute could save your OR up to \$1,900 per procedure (value of OR time: \$100/minute)

A Material Difference

PinkProtect™ is Xodus Medical's signature, proprietary patient-positioning material. Engineered to deliver exceptional security and protection, its innovative technology serves as the foundation for many of our patented patient safety solutions.

The Pink Hip Kit™

Postless Patient Positioning for Improved Surgical Outcomes

Eliminate Nerve Injury

Safely and effectively position patients without the need for a perineal post

Protection from Head to Toe

Maximize traction as well as protection against HAPIs with Hip Arthroscopy Boot Liners

Pink Hip Kit:

Hana
#72205682

Safer Surgery

Postless positioning enhances patient safety by eliminating the need for a perineal post, thereby reducing the risk of pudendal nerve and soft tissue injury while also improving surgeon ergonomics and visualization.

Reduced Risk of Hospital-Acquired Pressure Injuries (HAPIs)

The Pink Hip Kit features a breathable, moisture-wicking, soft, enveloping, immersive, and pressure-distributing material that interfaces with sensitive patient areas. This unique material provides an ideal balance of skin-protection properties that reduce the risk of HAPIs.

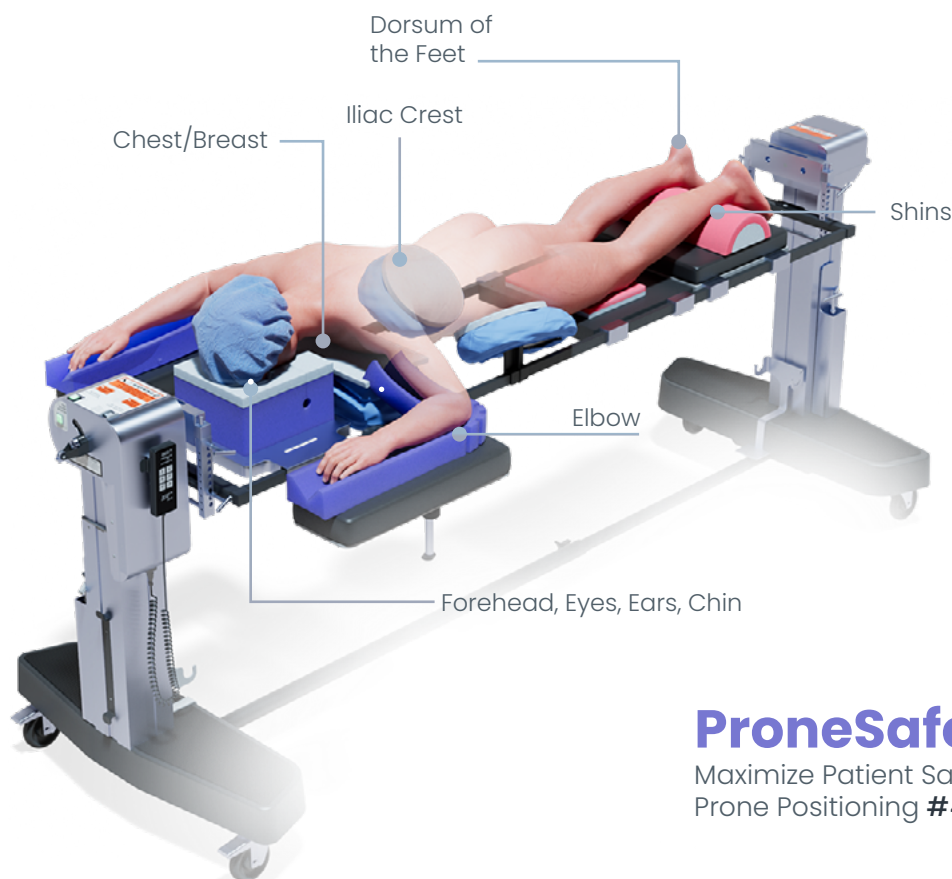

Streamlined Procedures

The absence of a perineal post enables unobstructed C-arm visualization, improved surgeon access, and greater freedom of movement, resulting in more comprehensive and efficient fluoroscopic imaging as well as enhanced dynamic examinations.

Surgical BackPacks™

Safer Spine and Prone Positioning Systems

#SPK10113
(Includes Four (4) Skin-Friendly Iliac/ Torso Covers)

#SPK10186

ProneSafe™

Maximize Patient Safety in Prone Positioning #40599

Patient Safety Advantages

- Improve HAPI protection with DermaProx™; a unique material that balances softness, breathability, immersion, envelopment, and moisture-wicking characteristics to create the ideal interface between patients and surgical equipment
- Enhance pressure distribution on bony prominences and high risk patient areas
- Minimize non-reimbursable care costs; avoid preventable injuries and CMS Never-Events
- Achieve a precise fit for your specific equipment with customizable kits

// “The Xodus products have greatly decreased skin redness and breakdown on the chin and bony prominences during long spinal cases. I have greater peace of mind using these products knowing that our patients are safe and better protected.”

— Mary Ann Pruskowski, RN, BSN, BSHA, CNOR, Neuro

Safer Single-Use Positioning

#40404

Slotted Head Positioner

- Provides anatomically correct positioning of the head and neck

#40409

Abduction Pillow

- Promotes proper positioning for optimal healing after surgery
- Concave sides and skin-friendly straps allow for a safe and secure fit

#40411

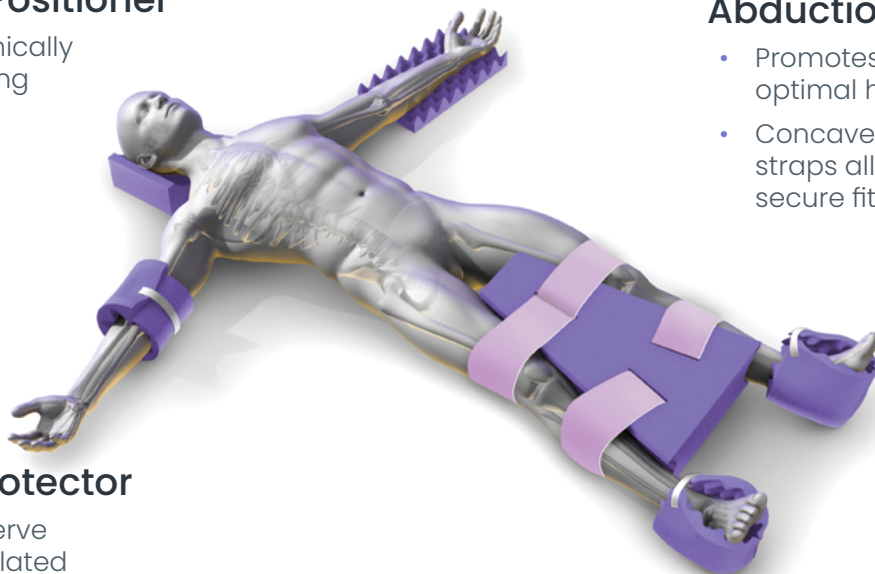

Ulnar Nerve Protector

- Protects Ulnar Nerve from pressure related complications

#40412

Heel Protector

- Protects Plantar Nerve

DermaProx™

A Necessity for Every Pressure Injury Prevention Program

- Simple, safe solutions that help patient safety advocates meet AORN Guidelines & Recommendations
- Breathable, moisture-wicking, pressure-distributing material helps prevent HAPI occurrence
- Protects skin without the use of sticky adhesives; the removal of which may cause skin tears

Product #	Dimensions
(A) #40527	11" x 8" x 0.5"
(B) #40528	11" x 15" x 0.5"
(C) #40529	11" x 15" x 1"
(D) #40514	22" x 14" x 0.5"

Camel Mats™ | Absorbent Floor Protection

Solutions for Maintaining Clean, Dry Hospital Floors

Help Eliminate Slips, Trips, and Falls

- Keep hospital floors clean and dry
- Single-use design improves infection control and reduces cross-contamination
- Non-slip backing for secure placement

Advanced Fluid Retention Technology

Fluid-absorbing polymer traps liquid for easy and convenient cleanup and enhances absorption, preventing fluid drips

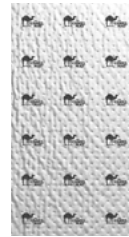

Camel Cord Cover™

Two peel strips reveal residue-free adhesive that secures the cover to the floor. This feature safely secures cords and decreases the risk of trips and falls.

Available in two sizes

Camel Mat – Standard Absorbent

Prod #	Size
#80510	24" x 32"
#80520	32" x 40"
#80527	32" x 56"

#80530	32" x 56"

The Soft Step™ | Anti-Fatigue Floor Mats

Increasing Safety and Comfort for Hospital Staff

- Tapered channels prevent problematic puddles in the OR
- Decrease muscle fatigue
- Increase safety and help prevent workplace injury
- Also available in extra-long and mini sizes

"Prolonged standing during surgical procedures poses a high risk of causing musculoskeletal disorders, including back, leg, and foot pain, which can be chronic or acute in nature."

— AORN Journal

Fitted Camel Mat

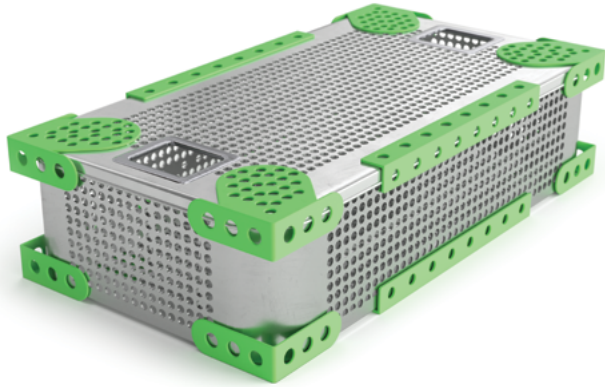

Extend the usable life of Soft Step mats by incorporating single-use, absorbent covers

Available in two sizes:

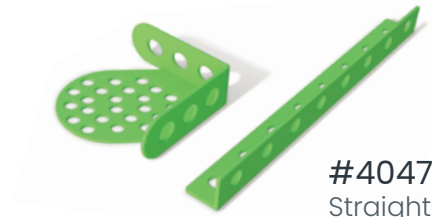

- #80536 - 39" x 24"
- #80537 - 74" x 24"

GreenGuard | Tray Protectors

Reusable Solutions for Surgical Tray Protection

#40478
Corner Protector

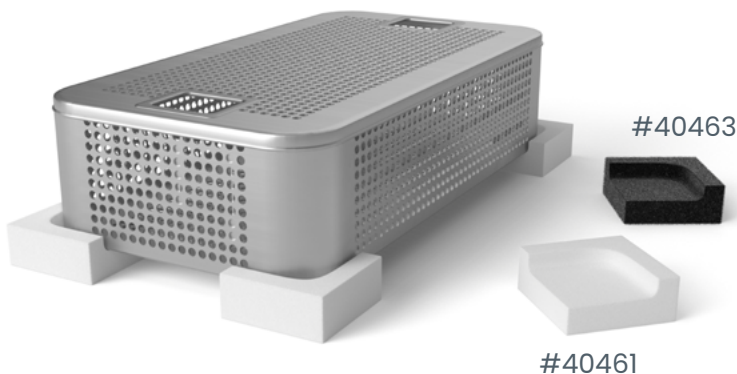

#40479
Straight-Edge
Corner Protector

- Ideal for heavy trays, both steam and Sterrad® compatible, works equally well on square or round corner trays
- Greater airflow decreases drying time and eliminates moisture retention
- Reusable, recyclable, and reduces the need for extra sterile wraps

“Minimum re-sterilization “wait cost” for the OR [is] \$1,342 (per incident)... Instrument availability and reliability are essential to a well-run, cost-effective OR environment.”^{3.9}

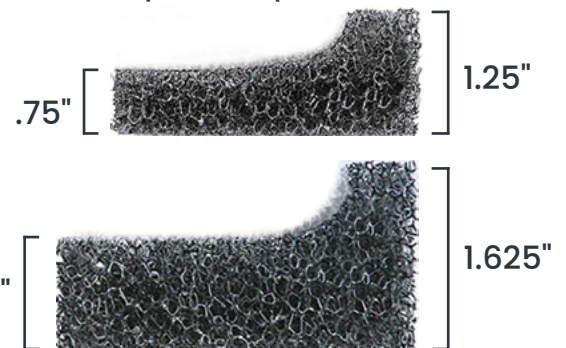

Single-Use Corner Protectors

Single-Use Solutions for Surgical Tray Protection

- Create a soft barrier to protect sterilization wrap from sharp corners; prevent holes and/or tears
- Eliminate unnecessary reprocessing costs created by contaminated surgical trays- (Average savings: \$40 per contaminated tray)
- Avoid double-wrapping trays
- Cost-effective solution

Depth Comparison

Electrosurgical Solutions

Grounding Pads

- Round, latex-free, split design with and without a 10 ft (3m) cord
- Overlapping gel-line border limits aluminum edge exposure, reducing burn risk
- Compatible with generators featuring contact quality monitors

Product No.	Description	Case QTY
#20240	Split Grounding Pad with Cord	50
#20230	Split Grounding Pad without Cord	50

Cautery Tip Cleaners

- Abrasive surface effectively removes tissue and debris with one pass
- Cleans uncoated (stainless steel) cautery tips
- Adhesive backing for universal placement
- X-ray detectable

Product No.	Case QTY
#30500	50

EZ Covers

- Prevents cross-contamination
- Easy open/close draw string
- Easy cleanup of blood & other infectious materials

Product No.	Case QTY
#50300	50

Pencils & Tips

- Superior non-stick coating reduces eschar buildup
- Easy to clean with only a damp sponge, saving valuable OR time
- Performance is exceptional at lower power settings, helping to minimize thermal necrosis risk
- Greater precision throughout procedures
- Available with PTFE coated, tungsten, or stainless steel tip styles
- Visit xodusmedical.com for an array of options

Rocker Pencil w/ Blade Electrode

Button Pencil w/ Blade Electrode

2.5 cm Tungsten Micro-Needle #20072

3 cm Tungsten Micro-Needle #20070

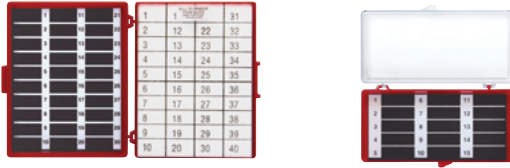

4 cm Tungsten Micro-Needle #20102

Operating Room Essentials

Needle Counters CE 0459

- Increase sharps safety
- Many styles available

Surgical Site Markers CE 0459

- Dual-tip
- Regular/fine tip
- Correct site
- CHG resistant ink

#30900

#80710

Room Turnover Kits

- Reduces risk of cross-contamination and frequency of SSIs
- Increases efficiency by reducing set up/clean up time

Magnetic Transfer Drapes CE 0459

- Keep instruments within reach
- Facilitate hands-free transfers

Emesis Bags

- Eliminates exposure to emesis
- Increases infection control
- Biodegradable

Flexible Light Handle Covers CE 0459

- Single-Use
- Eliminates costly, intensive reprocessing
