Foot Control		#20124		#20153

Patient Safety First

100% Tested

- Industry leading, heat-resistant Kynar insulation
 - » Single-use eliminates reprocessing
 - » Eliminates cross-contamination
 - » Lowers total costs
 - » Prevents insulation damage, associated burn risk
- Compromised insulation may lead to stray currents and thermal necrosis of non-targeted tissue—which carries the potential for peritonitis, other serious injury or even death
- Every electrode individually tested (high-potential stress test)
- PTFE coatings deliver consistent coagulation and resist flaking at high temperatures

PTFE Coating

Ultra durable coating resists eschar build up, cleans easily

Kynar™ Insulation

Extreme heat resistant insulation withstands the rigors of electro-surgery

Polyolefin Insulation

Minimize stray-sight burn risk with individually tested, full length insulation

Stainless Steel Core

High quality, solid cores improve durability, and conductivity

Kynar is a registered trademark of Arkema, Inc.

PTFE Coated Electrodes

	6.5" PTFE Coated Needle Tip Blade Electrode	Product No: #20023	50 /Case
	6.5" Standard Blade Electrode	Product No: #20062	50 /Case
	6.5" PTFE Coated Standard Blade Electrode	Product No: #20014	50 /Case
	6.5" PTFE Coated Standard Blade Electrode	Product No: #20015	50 /Case
	5" PTFE Coated Ball Tip Blade Electrode	Product No: #20018	50 /Case
	4" PTFE Coated Standard Blade Electrode	Product No: #20012	50 /Case
	4" PTFE Coated Standard Blade Electrode	Product No: #20013	50 /Case
	2.75" PTFE Coated Standard Blade Electrode	Product No: #20057	50 /Case
	2.75" PTFE Coated Standard Blade Electrode	Product No: #20058	50 /Case
	2.75" PTFE Coated Standard Blade Electrode	Product No: #20055	50 /Case
	2.75" PTFE Coated Standard Blade Electrode	Product No: #20056	50 /Case
	2.5" PTFE Coated Standard Blade Electrode	Product No: #20010	50 /Case
	2.5" PTFE Coated Standard Blade Electrode	Product No: #20011	50 /Case
	6.25" PTFE Coated Bayonet Blade Electrode	Product No: #20017	50 /Case

Tungsten Micro-Needles

	1.6" Tungsten Micro-Needle Blade Electrode	Product No: #20072	12 /Case
	2.75" Tungsten Micro-Needle Blade Electrode	Product No: #20070	12 /Case
	2.75" Tungsten Needle Tip Blade Electrode	Product No: #20102	12 /Case

Pencils with PTFE Coated Electrodes

High quality components and construction allow for precise switch control, safeguarding against accidental activation. Performance is exceptional at lower power settings, helping to minimize thermal necrosis risk. Patient safety is maximized through strict quality control and the use of premium materials. Optional preloaded, PTFE coated electrodes minimize eschar build-up.

#21850

Rocker Switch

#21800

Holsters Included With All Electrocautery Pencils

Grounding Pads

- Round, latex-free, split design with and without a 10 ft (3m) cord
- Overlapping gel-line border limits aluminum edge exposure, reducing burn risk
- Compatible with generators featuring contact quality monitors

Product No.	Description	Case QTY
#20240	Split Grounding Pad with Cord	50
#20230	Split Grounding Pad without Cord	50

Cautery Tip Cleaners

- Abrasive surface effectively removes tissue and debris with one pass
- Cleans uncoated (stainless steel) cautery tips
- Adhesive backing for universal placement
- X-ray detectable

Product No.	Case QTY
#30500	50

EZ Covers

- Prevents cross-contamination
- Easy open/close draw string
- Easy cleanup of blood & other infectious materials

Product No.	Case QTY
#50300	50
