

PinkProtect™ ICU Kits

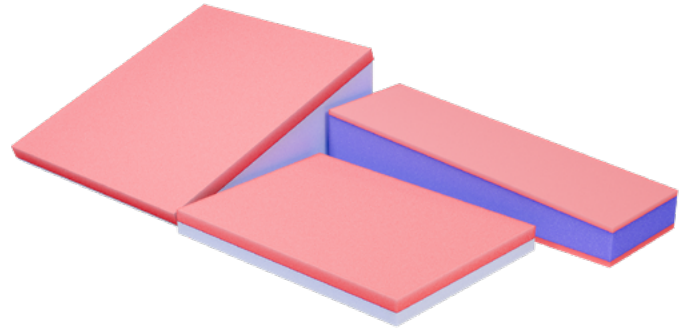

Patient Positioning Solutions for the ICU

Extended-positioning solutions composed of breathable, soft, moisture wicking materials that help prevent Hospital Acquired Pressure Injuries (HAPIs)

Innovative Patient Safety Advancements

- Featuring PinkProtect™ — a breathable, soft, moisture wicking material for the utmost protection against HAPI formation
- Proven, skin-friendly positioners designed to address the specific patient safety challenges of the Intensive Care Unit
- Supportive, high-density cores that help distribute pressure during lengthy patient positioning intervals
- Unique designs tailored to the specific requirements of ICU patient positioning

“95% of Hospital-Acquired Pressure Injuries can be prevented with early risk assessment and appropriate interventions¹”

Create a New Best-Practice

Customize our standard kits with positioners matched to the specific requirements of your patients.

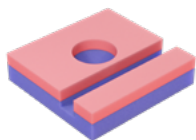

Proven Pressure Management

In a study of 15 subjects (BMI range: 16–54; mean BMI: 35.5), the Pink Pad achieved an average peak pressure reduction of 43%.

Hospital-acquired pressure injuries (HAPIs) cost over \$1 billion annually, increasing hospital stays by an average of nine days and resulting in non-reimbursed treatment costs that can exceed \$40,000 per patient.

#40770

PinkProtect™ SideProne
Head Positioner

#40771

PinkProtect Dual Layer
Pad (Large)

#40772

PinkProtect Dual Layer
Pad (Standard)

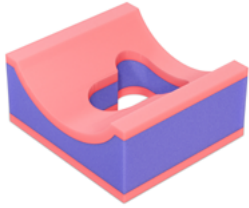

#40544

Pink Arc Positioner
(Standard)

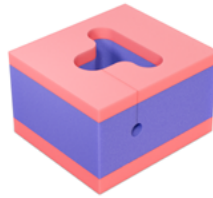

“Because of the severity of illness and the range of symptoms, these patients are highly prone to pressure injuries. The [PinkProtect] ICU kits provided us with an easy to use product that reduced the risk of (HAPIs) in our pronated patients.”

— Lisa Autz, RN, MAS, Director of Nursing, NYC

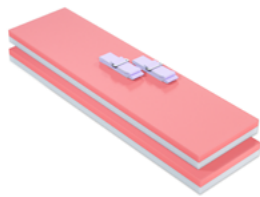

#40519
Supine Head Positioner

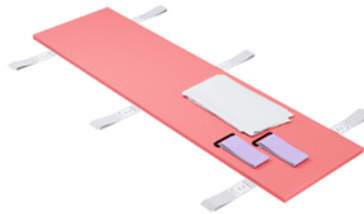

#40521
Prone Head Positioner

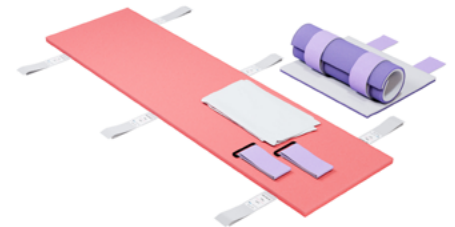

#40499
