ARTHROSLEEVE™

The ArthroSleeve maximizes patient safety during shoulder arthroscopy procedures. The ArthroSleeve supplies distal traction and abduction angle adjustability, while allowing humeral rotation. Adjustments can be made quickly and easily, maintaining the established rotation.

- Provides rotational control of the upper extremity
- Keeps the radial nerve positioned at the upper most point
- Wide straps secure arm to maintain position
- Adjustment flexibility affords better arthroscope placement, providing visual access that would otherwise be impossible
- Specially developed material lining provides a superior grip while minimizing risk of CMS Never Events (HAPU)

Product # 90415

A lining of skin-friendly material protects patient from Hospital-Acquired Pressure Ulcers (HAPU)
