

DERMAPROX™ PADS

A safe, simple and effective necessity for any pressure injury prevention program

THE DERMAPROX™ DIFFERENCE

DermaProx Pads safeguard skin against shearing and pressure-related complications. Fine-tune patient positioning with DermaProx Pads, providing superior, breathable protection in areas of skin-to-table surface contact.

Breathable, Adhesive-Free Skin Protection

- Open-cell and breathable material is designed to protect against skin damage/breakdown
- Reduces friction and helps keep skin dry and intact
- Creates a protective barrier for skin without use of sticky adhesives that can risk skin tears or maceration
- Available in two sizes, 8x11 and 11x15
- Prevents CMS Never Events and complies with AORN 2018 Patient Positioning Guidelines for pressure management
- Single-use eliminates risk of cross-contamination

ISO 13485 CERTIFIED
FDA REGISTERED
