

# Hip Arthroscopy Boot Liners

## Increase Patient Safety During Traction

Dual layer protection helps secure and cushion the patient's foot in anatomically correct position while in traction. Boot liners feature a protective layer of soft, breathable and moisture-wicking DermaProx™ to help minimize the risk of skin redness and tissue breakdown.

### THE DERMAPROX™ DIFFERENCE

Protective layer of DermaProx™ safeguards against shearing and pressure-related complications

- Dual layer protection cushions the patient's foot
- DermaProx™ layer promotes breathability and minimizes the risk of skin redness and tissue breakdown
- Reduces set-up time and creates a standard of care
- Bootliners are available for various tables
- Single-use design reduces cross-contamination risk
