Breathable, open-cell material wicks away moisture to keep skin dry

"Procedures lasting longer than 2.5 to 3 hours are significantly more likely to cause skin and underlying tissue damage."*

Product Number
#40610

72" x 20"

Pressure Relief: Reduce Risk of HAPIs

"Data on the costs of treatment vary, but some estimates range between \$37,000 and \$70,000 per pressure ulcer." **

- Full table length design protects peak pressure points (scapula, sacrum, heels) from skin breakdown and start of pressure ulcer formation
- Patented, open-cell material wicks away moisture to keep skin dry
- Minimizes risk of HAPI (Hospital-Acquired Pressure Injuries)
- Convenience of a kit affords easy set-up for enhanced patient safety and creates a universal standard of care
