

# ProneSafe™

## Maximize Patient Safety in Prone Position

### THE DERMAPROX™ DIFFERENCE

To more effectively manage pressure, the ProneSafe combines the strengths of two different materials — a comfortable, supportive base topped with a protective layer of DermaProx.

- Layer of skin-friendly DermaProx, specially-developed to safeguard against HAPUs
- Open cell design of DermaProx allows skin to breathe, preventing moisture build-up
- Supportive base promotes proper anatomical alignment
- Protects peak pressure points of the forehead, cheeks and chin from skin redness and breakdown

Product Number 40599

Two layers of protection maximize patient safety, safeguarding against HAPU formation.
