Correct Site Skin Markers
Comply with The Joint Commission’s requirements for correct site marking – a vital part of a risk-prevention strategy for identifying and verifying correct patient, surgical site and procedure.

Permanent and Medication Label Markers
Available in regular and fine tip, these markers are great for general operating room use on medication labels, bowls and basins.

Skin Markers
Indelible prep-resistant ink provides an effective means for general purpose skin marking – with a built-in ruler in centimeters and inches.

Dual Tip Markers
Dual Tip Markers help consolidate markers in the operating room environment – available in regular/fine tip skin marker and dual regular tip skin marker/permanent marker combinations.

All markers are available with rulers and labels. Customized labels are also available.
